

Joint EUSFLAT-LFA 2005 Barcelona, September 7-9

Fourth Conference of the European Society for Fuzzy Logic and Technology (EUSFLAT 2005) and 13 Rencontres Francophones sur la Logique Floue et ses Applications (LFA 2005).

Just like at the beginnings of the XXth century Barcelona provided Gaudi with the suitable environment for consolidating his Modernist architecture and sculpture, now Barcelona, in the beginnings of the XXIth century, provides scientist, engineers and practitioners working in Fuzzy Logic and related areas with the appropriate environment for exploring their imagination and consolidate their knowledge. Participants in the 4th international EUSFLAT Conference will find in Barcelona the perfect setting to present their latest achievements, to discuss their developments, and to expose and consider future directions and projects
